Summary

Java Backend Engineer with 4.5+ years of experience designing and delivering scalable enterprise applications. **Improved API response times by 20%, resolved 300+ critical bugs, and achieved a 95+** Lighthouse performance score on personal projects.

Experience

Software Engineer, WebKorps – Indore Oct 2025 – Present

Project: SafeExpress (Logistics ERP System)

- Designed and developed a scalable **Logistics ERP system** managing end-to-end shipment lifecycle including **inbound, outbound, tracking, and delivery operations**
- Architected and implemented **Spring Boot microservices** to handle high-volume shipment processing with improved modularity and scalability
- Used **AWS CodeCommit** for version control, enabling collaborative development and maintaining clean branching strategies
- Designed and maintained **CI/CD pipelines using Jenkins**, automating build, testing, and deployment processes across environments
- Performed **API performance tuning and query optimization**, reducing response time for critical shipment APIs
- Troubleshot and resolved **production issues**, ensuring system stability, reliability, and minimal downtime
- Collaborated with cross-functional teams (QA, DevOps, frontend) to ensure smooth delivery and integration of features

Software Engineer, Serosoft Solutions – Indore Jun 2024 – Sep 2025

Project: Academia ERP (Examination Module)

- Developed and maintained backend services using **Java, Spring Boot, Hibernate, and MySQL** for managing end-to-end examination workflows including scheduling, grading, result processing, and course-to-program mapping
- Designed and implemented **RESTful APIs** to support seamless integration between multiple ERP modules and external systems
- Implemented **JWT-based authentication and role-based access control (RBAC)** to ensure secure access to sensitive academic and examination data
- Designed optimized **database schemas and complex SQL queries**, improving performance for large-scale student datasets
- Handled **high-volume data operations** such as bulk result processing, student record management, and report generation
- Performed **query optimization and performance tuning**, reducing API response time by **20%**
- Identified and resolved **300+ critical bugs**, improving application stability and reducing production issues
- Collaborated with frontend teams to ensure **smooth API integration and data consistency** across modules
- Participated actively in **Agile Scrum processes**, including sprint planning, task estimation, daily stand-ups, and retrospectives
- Worked on **code refactoring and enhancement**, improving maintainability and reducing technical debt
- Troubleshot and resolved **production issues and data inconsistencies**, ensuring reliable system performance

Associate Software Engineer, Rakuten Symphony India – Indore Mar 2022 – Mar 2024

Project: Telecom Infrastructure Platform

- Developed and enhanced backend services using **Java, Spring Boot, Hibernate, and MySQL** for telecom infrastructure management systems
- Designed and maintained **scalable and secure RESTful APIs** for seamless integration across distributed telecom modules
- Worked on **large-scale data processing systems**, ensuring reliable data flow and consistency across services
- Implemented **unit testing using JUnit** and followed best practices to improve code quality and reduce defects
- Performed **SQL query optimization and database tuning**, improving overall application performance
- Participated in **code reviews via Bitbucket**, ensuring adherence to coding standards and best practices
- Collaborated in **Agile Scrum teams**, contributing to sprint planning, estimation, and delivery
- Debugged and resolved **production issues**, ensuring system uptime and operational stability
- Gained experience working with **distributed systems and microservices-based architecture**

Skills

Languages: Java SE/EE, SQL, RESTful APIs, Microservices, Monolithic Applications

Frameworks & Libraries: Angular, Spring Boot, Spring MVC, Spring Security

Tools & DevOps: Git, Bitbucket, CI/CD, Docker, Kubernetes, Netlify, AWS, GCP, Azure, Jenkins, Prometheus, Grafana

Testing & Quality: JUnit, Test-Driven Development, Agile/Scrum

Design & Collaboration: Jira, Confluence, Agile Project Management

Security & Authentication: JWT Authentication, Role-Based Access Control, API Gateway

Databases & Messaging: MySQL, Database Schema Design, SQL Query Optimization, Kafka, RabbitMQ

Projects

Portfolio Link

Designed and developed a responsive personal portfolio website using HTML, CSS, JavaScript, Bootstrap, and jQuery, featuring dynamic components, cross-browser compatibility, and optimized performance. Deployed the site on Netlify, achieving a 95+ Lighthouse performance score and improved page load speed.

Education

Medi-caps University MU, Indore, Master of Computer Applications 2022

Softvision Educational Society, Indore, Bachelor of Computer Applications 2020
